

# ultraviolet excluded

## Overview of the main features / multi lenses

**Nothing less than the best!**  
The high tech material from Bayer MaterialScience AG  
The basis for our lens technology

**litemirror silver 8 - 18 % S 3**  
sun protection for intensive light - IR-protection

**Unique lens coating technology**

- super anti-fog
- nano technology - easy to clean effect
- super anti-scratch
- super anti-static
- highly break-resistant
- 100% UVA-, UVB-, UVC protection

**lasergold lite 43 - 80 % S 1**  
super contrast - for bad view (fog and cloudy weather)

**Makes a visible difference**

- attenuates and filters diffuse light
- glare-free vision, eliminates irritating reflections
- beneficial, properly dosed light
- eye-friendly
- natural colours, natural contrast
- highly break-resistant
- absolutely optically correct
- 100% UVA-, UVB-, UVC protection

**litemirror orange 43 - 80 % S 1**  
super contrast - suitable for sunny weather - IR-protection

**litemirror radar dégradé 43 - 80 % S 1**  
contrast - IR-protection

**Gradient lens system**

- anti-glare protection from above
- clear downward vision

**smoke 8 - 18 % S 3**  
sun protection for the whole day - colour neutral view

**Photochromatic lens system**

- automatic adaptation to lighting conditions

**litemirror brown 8 - 18 % S 3**  
sun protection for the whole day - good contrast - IR-protection

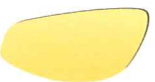

**Lite mirror technology**

- IR protection
- up to 18 layer mirror coating
- super anti-static
- highly break resistant
- super contrast
- absolutely optically correct
- 100% UVA-, UVB-, UVC protection

**litemirror smoke dégradé 18 - 43 % S 2**  
anti-glare protection from above. clear downward vision. Sun protection for the whole day - good contrast - IR-protection

**VARIOMATIC orange 60 - 42 % S 1-2**  
super contrast for bad view

**clear 80 - 100 % S 0**  
for night use - protection against wind, insects and dust

**VARIOMATIC smoke 54 - 38 % S 1-2**  
sun protection for the whole day, colour neutral view

**litemirror clear 43 - 80 % S 1**  
for night use - protection against wind, insects and dust - IR-protection

**VARIOMATIC brown 43 - 55 % S 1**  
sun protection for the whole day, good contrast

**litemirror clear dégradé 43 - 80 % S 1**  
anti-glare protection from above. clear downward vision. Protection against wind, insects and dust - protection

**POLAVISION® 8 - 18 % S 3**  
for the visible difference. glare-free vision, eliminates irritating reflections. Sun protection for the whole day - natural colours, natural contrast
